SUMMARY

Aspiring Cybersecurity and DevSecOps professional with strong foundation in system administration, network defense, and IT infrastructure. Skilled in Linux/Windows server management, firewall setup, and tools like Snort, Wireshark, Jenkins, Docker, Ansible, and Wazuh. Hands-on experience in real-time threat detection, incident response, log analysis, and SIEM-based security automation..

Eager to apply cybersecurity skills in enterprise environments and grow as a SOC/DevSecOps engineer.

TECHNICAL SKILL

- **Operating Systems:** Ubuntu, Debian, Windows Server , RHEL
 - **Networking:** TCP/IP, OSI Model, Subnetting, Firewall
 - **Security Tools:** Snort, Wireshark, Nmap, iptables, Fail2Ban
 - **Programming:** Python, Bash, C (Basics)
 - **DevOps Tools:** Git, Jenkins, Docker, Kubernetes
 - **Others:** Ansible (Basics), VirtualBox, VMware, REST APIs
 - **Soft Skills:** Analytical Thinking, Collaboration, Threat Intelligence, Time Management
-

EDUCATION

- **PG-DITISS** (Cybersecurity Specialization) – CDAC Sunbeam, Pune | Expected 2025
 - **B.E. in Computer Engineering** – SPPU | 2024 | CGPA: 7.45
 - **Diploma** – MSBTE | 2021 | 80.47%
 - **SSC** – Maharashtra State Board | 2018 | 78.60%
-

PROJECTS

- ◆ **RDX – Responsive Defence & X Response (PG-DITISS Project)**
 - Built a cybersecurity monitoring & SOC-style incident response pipeline using ELK Stack, Wazuh, Snort & Ansible , enhancing threat detection and response time.
 - Reduced alert response time by 40% using real-time Slack/Email alerts; deployed Kibana dashboards for 24/7 visibility. & log management via centralized dashboards
 - ◆ **Campus Placement Prediction (B.E. Final Year Project)**
 - Designed a system to predict student placements using academic and aptitude data.
 - Contributed to boosting placement training efficiency by 20%, as per retrospective feedback from training coordinators.
 - ◆ **Web Development Projects**
 - Personal Portfolio Website , Grocery Store , Weather Forecast Application
