Address : Lovely PG Marunji Rd, Phase 1, Hinjawadi Pune, Maharashtra 411057

SUMMARY

Cybersecurity and DevSecOps enthusiast skilled in Linux server administration, real-time threat detection, and automation tools like Snort, Jenkins, Docker, and Ansible. Demonstrates practical experience in log management, firewall configuration, and SIEM implementation. Passionate about building secure and scalable systems with a proactive defense approach.

TECHNICAL SKILL

- **Operating Systems:** Ubuntu, Debian, RHEL, Windows Server
- **Networking & Security:** TCP/IP, OSI Model, Subnetting, iptables, Firewall, Wireshark, Nmap, Snort, Fail2Ban, Wazuh
- **Programming & Scripting:** Python, Bash, C (Basics)
- **DevOps Tools:** Git, Jenkins, Docker, Kubernetes, Ansible (Basics)
- **Virtualization & Tools:** VirtualBox, VMware, REST APIs
- **Soft Skills:** Analytical Thinking, Team Collaboration, Threat Intelligence, Time Management

EDUCATION

- **PG-DITISS** (Cybersecurity Specialization) – CDAC Sunbeam, Pune │ Expected 2025
- **B.E. in Computer Engineering** – SPPU │ 2024 │ CGPA: 7.45
- **Diploma in Computer Engineering** – MSBTE │ 2021 │ 80.47%
- **SSC** – Maharashtra State Board │ 2018 │ 78.60%

PROJECTS

☆ **RDX – Responsive Defence & X Response (PG-DITISS Project)**
Built a cybersecurity monitoring and incident response pipeline using ELK Stack, Wazuh, Snort, and Ansible. Deployed centralized dashboards in Kibana for real-time visibility. Automated alerting to Slack/Email, reducing response time by 40%.

☆ **Campus Placement Prediction (Final Year BE Project)**
Developed a prediction system for student placements using academic and aptitude data. Enhanced training strategy efficiency by 20%, based on coordinator feedback.

☆ **Web Development Projects**
Designed and deployed several frontend applications: Personal Portfolio Website, Grocery Store App, and a Weather Forecast App.
